Wallblake Runway Extension
Anguilla

PCN REVIEW

Dear Sir,

Following a review of the test results of material used in the runway construction against the values assumed in the Pavement design and in the Specification, our Head Office advises that the PCN of the new Runway as constructed is PCN 22.

On the existing part of the Runway that remains, the PCN would have increased by 10 as a result of the new overlay.

Yours Faithfully,
For
Scott Wilson Kirkpatrick & Co.Ltd
