SCHEDULE: Forms

PART 1

AMATEUR RADIO COMMUNICATION STATION AND LICENCE

Definition

1. In these Regulations, "Form" means a form set out in the Schedule.

Amateur Radio communication station licence

2. The establishment of an amateur Radio communication station will be authorised and licences issued subject to the following conditions—

(a) application must be made in writing to the Telecommunications Officer setting out the following particulars, that is to say, age of applicant, type of equipment to be employed, reasons for applying for an amateur licence and the nature of investigations intended;

(b) licences may be granted to—

(i) persons of British nationality, or

(ii) foreign nationals who hold current radio amateur licences issued by their own administrations, in cases where such licences are of a kind which would not have been issued unless the holder had reached the standard of technical and morse proficiency required under section 4,

but the Governor may, in any particular case, authorise the issue of a licence with and subject to such additional conditions and terms as he may prescribe;

(c) the Licensee shall observe the provisions of the International Telecommunication Convention and the Regulations annexed to the Convention and any conditions which may be set out on the licence;

(d) the Licensee shall not receive any payment (either direct or indirect) for the use of the station or allow the station to be controlled by or used for the purposes of any social or political organisation.

Form of licence

3. An amateur Radio communication station licence shall be in Form 1.

Requirements of licence

4. (1) Every applicant for an amateur Radio communication licence will be required to satisfy the Telecommunications Officer as to his technical knowledge of the theory and practice of Radio communication.

(2) Subject to subsection (4), the Telecommunications Officer may, for the purposes of subsection (1), direct that the applicant submit himself for examination, the syllabus of which shall be—

(a) Electricity and Magnetism, comprising—

(i) the elementary theory of electricity; conductors and insulators; units including power, Ohm's law; resistances in series and parallel;

(ii) permanent magnets and electro-magnets and their uses in radio;

(iii) self and mutual inductance; types of inductances used in receiving and transmitting circuits;

(iv) capacitance, capacitors in series and parallel; construction of condensers; electrolytic condensers;

(b) Radio Principles (Elementary treatment only), comprising—

(i) alternating currents; series and parallel A.C. circuits incorporating inductance, capacitance and resistance, impedance, resonance, acceptor and rejector circuits; coupled circuits;

(ii) Radio waves; wavelength, frequency; velocity; nature and propagation of radio waves; fading and its connection with frequency, length of path;

(c) Thermionic Valves and Circuits, comprising—

(i) construction of valves; thermionic emission; principles and characteristics of diode and triode valves. Multi-electrode valves;

(ii) use of valves; amplification, oscillation, frequency changing, signal detection; the power stage; power rectification;

(iii) power packs for H.T. supply; smoothing;

(d) Radio Receivers, comprising—

(i) the essentials of a receiver;

(ii) typical receivers; principles and operation of T.R.F., superheterodyne and super-regenerative receiver;

(iii) C.W. reception;

(iv) interference caused by receivers;

(e) Low-Power Transmitters, comprising—

(i) oscillator circuits; frequency stability; use of quartz crystal to control oscillators; frequency multipliers; power amplifiers. Methods of modulation and keying;

(ii) avoidance of harmonic radiation and interference by shock excitation; use of key-click filters and other means of preventing spurious emissions;

(iii) dangers of overmodulation;

(iv) use of wavetraps and other devices for reducing interference with nearby broadcast receivers;

(f) Aerials, comprising—

(i) Simple types of receiving and transmitting aerials;

(ii) Transmission lines;

(iii) Simple directional aerials;

(iv) Aerial couplings to lines and transmitters;

(g) Measurements, comprising—

(i) measurements of frequency and simple frequency meters (including crystal type);

(ii) artificial aerial and their use for lining up transmitters;

(iii) measurement of anode D.C. current and voltage;

(iv) power input to final stage;

(h) Licence Conditions, comprising—

(i) conditions laid down for transmitting licences covering power and frequencies, frequency control and measurement, sending periods, avoidance of interference to other stations, log of sending periods, use of call-signs of calling and called stations, control in emergency, etc. (Particular importance is attached to this section of the syllabus);

(ii) proof of competency in morse transmission and reception must be given in a test transmission and reception in which a speed of 12 words per minute in plain language must be achieved;

(iii) measurement of anode D.C. current and voltage.

(3) Every applicant for an amateur Radio communication licence will be required to satisfy the Telecommunications Officer as to his ability to send and receive messages in the morse code and prove his competency in a test transmission and reception, in which a speed of at least 12 words per minute in plain language is achieved.

(4) The Telecommunications Officer may, in the case of an applicant who possesses equivalent or better technical qualifications, exempt him from submitting to an examination, the onus however being on the applicant to produce satisfactory evidence of his qualifications.

Requirements for operation of amateur Radio communication station

5. An amateur Radio communication station must be operated within the band of frequencies specified in the licence and must be so adjusted that no interference shall be caused on frequencies outside of the specified band. Adequate frequency stabilization must be employed and stability must be in accordance with the Radio Regulations.

PART 2

MARINE RADIO COMMUNICATION INSTALLATIONS

Categories of marine radio installations

6. (1) Marine radio installations for radio telegraph operation will be considered in two categories—

A. Cargo vessels not exceeding 1,600 tons gross tonnage and passenger vessels whose route of operation does not involve distances of more than 200 miles from the nearest land; and

B. Cargo vessels exceeding 1,600 tons and passenger vessels whose operations involve distances in excess of 200 miles from the nearest land.

(2) Vessels in category A may be fitted with radio telegraph installations on a voluntary basis for operation on the 500 Kc marine radio telegraph channel and such other of the appropriate maritime mobile frequencies as may be published from time to time. Such vessels may employ radio telephony if desired.

(3) Vessels in category B *must* be fitted with a radio communication installation conforming with the international requirements, except that passenger vessels up to and including 1,600 tons gross operating on routes not exceeding 200 miles from the nearest land may be authorised to carry a radio telephone installation in lieu of the radio telegraph.

(4) In all other cases radio telegraph facilities must be provided and such facilities shall be in accordance with the international requirements as regards power, type of equipment and installation.

Requirements of mobile and fixed radio communications

7. (1) Mobile and fixed radio communication for marine operations shall be operated in accordance with these Rules and International Regulations in force from time to time.

(2) Marine radio installations, when operating on the frequencies specified in the licence, must conform with the International Regulations regarding frequency tolerances and must not cause interference on any other frequencies.

(3) The operating procedure for marine radio service shall be in accordance with the international Regulations for Maritime Mobile Service.

(4) The transmission of unnecessary or anonymous calls is forbidden.

(5) The use of radio apparatus while in port or harbour is prohibited except in cases of emergency or for urgent messages, when no other form of communication is available.

(6) A log book giving a record of calls made and time should be kept by all licensed cargo and passenger vessels.

(7) The radio installation, accessories, and all logs and message files shall be available for inspection at any reasonable time by the Telecommunications Officer or a person duly authorised by him in that behalf.

(8) It is prohibited to receive radio correspondence other than that which the station is authorised to receive, but, in case such correspondence is received involuntarily, it must be neither reproduced nor communicated to third persons, nor used for any purpose whatever, and the very existence thereof must not be revealed. The contents of any message must not be disclosed other than to the addressee.

(9) Marine radio installations for radio telephone operation shall consist of transmitting and receiving equipment suitably installed for operation by the master of the vessel, or his duly authorised agent, on the appropriate frequencies.

(10) The equipment when operating on the frequencies specified in the licence must not cause interference on any other frequency and must be within the tolerances specified.

Licences for radio telephone, etc.

8. (1) Licences are required for each radio telephone or telegraph installation and for operating personnel.

(2) (a) An application for licence to operate an aircraft radio station licence shall be in Form 2.

(b) The form of aircraft radio telephone operating licence shall be in Form 2A.

(c) The form of aircraft (Personal) Ground Communication licence shall be in Form 2B.

(3) The form of Marine Radio Telephone operating licence shall be in Form 3 or 4 and shall be of two kinds, namely—

(a) Radio telephone licence A. (General);

(b) Radio telephone licence B. (Restricted).

(4) A Radio telephone licence A. (General) will be granted to applicants with the following qualifications—

(a) practical knowledge of radiotelephony, especially as regards the avoidance of interference;

(b) knowledge of the adjustment and working of radiotelephone apparatus;

(c) ability to send correctly and to receive correctly by telephone;

(d) knowledge of the Regulations applying to the exchange of radiotelephone communications and of the part of the Radio Regulations relating to the safety of life.

(5) A Radio telephone licence B. (Restricted) will be granted to applicants with the following qualifications—

(a) Ability to send correctly and receive correctly by telephone;

(b) Knowledge of the Regulations applying to the exchange of radiotelephone communications and of the part of the Radio Regulations relating to the safety of life.

(6) The form of Ship Radio Communication licence shall be in Form 5.

(7) The form of a Business Radio Licence shall be in the following forms, according to the class of licence applied for—

(a) Form 6 shall be granted in respect of a Land Station;

(b) Form 7 shall be granted in respect of a Mobile Station;

(c) Form 8 shall be granted in respect of a Coast Station.

Licences for Marine Radio telegraph

9. (1) Marine Radio telegraph licences for operating personnel will be of three kinds, namely First Class, Second Class and Special.

(2) A first class licence in Form 9 will be issued to operators who have given proof of the technical and professional knowledge and qualifications set out below—

(a) knowledge of general principles of electricity, of the theory of radiotelegraphy and radiotelephony, and of the adjustment and practical working of the types of apparatus used in the radiotelegraph and radiotelephone mobile service, including apparatus for radio direction-finding and the taking of direction-finding bearings;

(b) theoretical and practical knowledge of the working of the accessory apparatus, such as motor-generators, accumulators, etc., used in the operation and adjustment of the apparatus specified in paragraph (a);

(c) practical knowledge necessary to effect, with the means available on board, the repair of damage which may occur to the apparatus during a voyage;

(d) ability to send correctly and to receive correctly by ear, code groups (mixed letters, figures and signs of punctuation), at a rate of 20 (twenty) groups a minute, and a plain language passage at a speed of 25 (twenty-five) words a minute provided that—

(i) each code group must comprise five characters, each figure or punctuation mark counting as two characters,

(ii) the passage in plain language must average five characters to the word, and

(iii) the duration of each test of sending and of receiving will, as a rule, be five minutes;

(e) ability to send correctly and to receive correctly by telephone;

(f) detailed knowledge of the Regulations applying to the exchange of radio communications, knowledge of that part of the Convention for the Safety of Life at Sea which relates to radiotelegraphy;

(g) knowledge of the general geography of the world, especially the principal navigation routes and the most important Radio communication routes;

(h) if necessary, candidates should have knowledge of a language widely used in the international correspondence of the mobile service and be able to express themselves in a satisfactory manner, both orally and in writing.

(3) A second class licence in Form 10 will be issued to operators who have given proof of the technical and professional knowledge and qualifications enumerated below—

(a) elementary theoretical and practical knowledge of electricity, radiotelegraphy and radiotelephony, as well as knowledge of the adjustment and practical working of the types of apparatus used in the mobile radiotelegraph and radiotelephone service, including apparatus for radio direction-finding and the taking of direction-finding bearings;

(b) elementary theoretical and practical knowledge of the working of the accessory apparatus, such as motor generator sets, accumulators, etc., used in the operation and adjustment of the apparatus mentioned in (b);

(c) practical knowledge sufficient for effecting minor repairs in case of damage occurring to the apparatus;

(d) ability to send correctly and to receive correctly by ear, code groups (mixed letters, figures and signs of punctuation) at a speed of 16 (sixteen) groups a minute and a plain language passage at a speed of 20 (twenty) words a minute, provided that—

(i) each code group must comprise five characters, each figure or punctuation mark counting as two characters;

(ii) the duration of each test of sending and of receiving will, as a rule, be five minutes;

(e) Ability to send correctly and to receive correctly by telephone;

(f) Knowledge of the Regulations applying to the exchange of radio communications, knowledge of that part of the Convention for the Safety of Life at Sea which relates to radiotelegraphy.

(4) A special licence in Form 11 will be issued to operators on proof of the following qualifications—

(a) Ability to send and receive plain language and code groups at a speed of 15 (fifteen) words per minute;

(b) Knowledge of the Regulations and Procedures and the procedure for emergency and safety operations;

(c) Knowledge of the particular equipment to be operated and ability to operate the installation correctly and to ensure correct frequency of transmission and reception;

(d) Ability to carry out simple maintenance and replacements.

PART 3

RADIO COMMUNICATIONS BROADCASTING STATION LICENCE

Application for licence

10. Application for licence to establish, install, work and operate a radio communications broadcasting station shall be in Form 12.

Form and conditions of licence

11. (1) Every such licence shall be in Form 13 and shall be subject to the following additional conditions and restrictions—

(a) the frequency of the waves emitted shall be as constant and as free from harmonics and other unessential emissions as the state of the air permits;

(b) keying shall be effected in such manner that key clicks are minimised as much as possible;

(c) aerials or aerial feeders shall be coupled in such manner as to minimise the radiation of harmonics and key clicks and to ensure that no direct current or low frequency alternating current is applied to the aerial or the aerial feeders;

(d) the authorised call letters as inserted in the licence shall be used on all occasions when communication is effected and in the case of radio-telephone stations the call letters shall be followed by an announcement of the town and country in which the calling station is situated;

(e) a log shall be kept in which shall be entered the following details of all calls and communications effected—

(i) date,

(ii) time each transmission is commenced and ended,

(iii) frequency expressed in kilocycles or megacycles, on which the transmission is effected, and

(iv) power (input to the anode or anodes of the valve or valves coupled to the aerial).

(2) The Telecommunications Officer shall be satisfied—

(a) that a frequency meter or other equipment is always available to the Licensee to check the frequency of transmission; and

(b) that the Licensee understands the use of the equipment used for checking such frequency.

(3) Except as may be necessary for authorised systems of modulation, unrectified or inadequately smoothed alternating current, or inadequately smoothed direct current shall not be applied to any circuit in such manner as to modulate unnecessarily the carrier wave.

(4) Save and in so far as may be specially provided in the terms of any licence, the use of spark transmitting apparatus shall be prohibited except in cases of danger or distress when the use of any system of communication concerned with safety of life shall be permitted.

PART 4

PRIVATE RADIO COMMUNICATION STATION AND LICENCE

Form and granting of licence

12. (1) A Private Radio communication Station licence may be granted for the purpose of radio communication with fixed stations in Anguilla or such other stations as may from time to time be approved by the Governor and shall be in Form 14.

(2) An application for a private Radio communication station licence shall be made in writing to the Telecommunications Officer and shall give full particulars of the make of transmitter and receiver together with the exact locality in which they are to be installed and the time at which it is proposed to operate the station.

(3) Such licence shall normally only be issued for the exchange of private and business messages of the licensee, but the Telecommunications Officer may require the station, from time to time, to transmit and receive public correspondence at such rates as may be fixed by the licensee.

(4) A private Radio communication station licence shall be granted only where no public radio telephonic communication is reasonably available.

Licensing requirement of operator

13. A Telecommunications Officer may require a station licensed as a private Radio communication station to be operated by the holder of an aeronautical radio telephone operating licence or marine radio telephone operating licence, or a marine radio telegraph licence for operating personnel.

Allocation of frequencies, etc.

14. (1) The frequencies or wavelengths at which any private Radio communication station shall be operated shall be allocated by the Telecommunications Officer at the time the licence is granted.

(2) The licensee shall provide such station with an adequate means of determining the frequency or length of wave emitted.

Inspection

15. The Radio communication apparatus and equipment shall be open to inspection by the Telecommunications Officer or his nominee at all reasonable times.

Operating instructions

16. Every licensee shall conform with any operating instructions issued by the Telecommunications Officer and with the conditions set out in his licence.

Annual licences and renewals

17. Notwithstanding the provisions of section 32(1), private Radio communication station licences shall be annual and shall expire on the 31st day of December of the year in which they are issued, and application should be made for renewal of such licences not later than one month before the expiration thereof.

Suspension or withdrawal of licence

18. (1) The Telecommunications Officer may suspend or withdraw any private Radio communication station licence if a state of emergency arises in which it is expedient in the public interest to do so or if the licensee contravenes any of the conditions attached to his licence.

(2) Any licensee who is aggrieved by a suspension or withdrawal of his licence under this section may, within one month of such suspension or withdrawal, appeal in writing to the Governor whose decision shall be final.

PART 5

RADIO COMMUNICATION (RECEIVING) LICENCES

Application for licence

19. (1) Every purchaser of a Radio communication (receiving) apparatus shall immediately make application to the Telecommunications Officer for a licence which shall be in Form 15.

(2) Application forms will be made available to the dealers of radio apparatus and must be filled in at the time of purchase and transmitted to the Telecommunications Officer.

Cancellation on ceasing to possess apparatus

20. (1) Any holder of a licence referred to in section 19 who ceases for any reason to possess a Radio communication (receiving) apparatus shall within 7 days of such cessation produce his licence to the Telecommunications Officer for cancellation.

(2) All licences not cancelled by the 31st January in any year shall be deemed to be in force for that year.

Licences for press messages, etc., to organisations only

21. Licences for the operation of Radio communication (receiving) apparatus for the reception of press messages, stock market quotations, etc., either by manual, facsimile or other automatic printing apparatus will be issued only to *bona fide* Press or other organisations, who give proof of authorisation, by agreement or by partnership, from the originators or publishers of the information transmitted for such reception.

Issue of licences to organisations

22. (1) Licences will be issued permitting the installation and operation of Radio communication (receiving) apparatus in accordance with the appropriate use of such press or other services.

(2) The Telecommunications Officer may prescribe on the licence such conditions as may be necessary according to the agreement with the originators of the transmitted information.

Form of licence

23. Radio communication (receiving) apparatus licences shall be in Form 16 with such variations as may be necessary to make the same applicable.

Limitation on use of apparatus

24. No Radio communication (receiving) apparatus licensed for the reception of press messages, stock market quotations, etc., may be used for the reception of public correspondence, nor may any matter received be sold or disclosed to the public other than in the form of press publications carried in the authorised press publications.

Licence not to infringe copyright

25. No licence shall authorise the licensee to do any act which is an infringement of any copyright which may exist in the matter transmitted.

PART 6

ELECTRICAL INTERFERENCE WITH RADIO COMMUNICATION RECEPTION

Suppression of interference

26. (1) If at any time any vehicle, apparatus, motor, machinery, installation or appliance as described in the relevant section of the Telecommunications Act, causes interference with any Radio communication station or reception, the Telecommunications Officer may require it to be fitted at the owner's expense with devices or suppressors to limit such interference.

(2) After being fitted with a device or suppressor, the vehicle, apparatus, motor, machinery, installation or appliance referred to in subsection (1) shall not be used without them.

Where suppression not possible

27. If it is found impossible to suppress the interference referred to in section 26, the Telecommunications Officer may require the owner of the vehicle, apparatus, motor, machinery, installation or appliance to discontinue its use or to remove it to such a distance from any Radio communication station or Radio communication (receiving) apparatus as may be necessary to limit interference.

PART 7

USE OF RADIO COMMUNICATION ON SHIPS AND AIRCRAFT

Use of Radio communication on merchant ship

28. (1) All apparatus for Radio communication on board a merchant ship in the territorial waters of Anguilla shall be worked in such a way as not to interfere with—

(a) naval signalling; or

(b) the working of any Radio communication station lawfully established, installed or worked in Anguilla or the territorial waters thereof, and in particular with the transmission of any messages between Radio communication stations established as aforesaid on land and Radio communication stations established on ships at sea.

(2) For the purposes of subsection (1), "naval signalling" means signalling by Radio communication between two or more ships of Her Majesty's Navy, between ships of Her Majesty's Navy and Naval Stations, or between a ship of Her Majesty's Navy or Naval Station and any other Radio communication station whether on shore or on any ship.

(3) No apparatus for Radio communication on board a merchant ship shall be worked or used while such ship is in any harbour, port or bay of Anguilla except with the special or general permission of the Telecommunications Officer.

(4) For the purpose of any proceedings under this Part, the master or person being or appearing to be in command or charge of any ship shall be deemed to have authorised and to be responsible for the use or working of any Radio communication apparatus on board such ship.

(5) Any summons or other document in any proceedings under this Part shall be deemed to have been duly served on the person to whom the same is addressed by being left on board the ship on which the offence is charged to have been committed with the person being or appearing to be in command or charge of the ship.

(6) This rule shall not apply to the use of Radio communication for the purpose of making or answering signals of distress.

Use of Radio communication by aircraft

29. The use of apparatus for Radio communication on civil aircraft whilst that aircraft is in or over Anguilla or the territorial waters thereof is permitted only for navigational purposes in connection with the landing and berthing of the aircraft or for necessary signals in a case of emergency.

PART 8

LICENSED DEALERS

Applications for licence

30. Every person who intends to apply for a dealer's licence shall make application therefor in Form 17, and the applicant shall furnish all the particulars required by the Form.

Form of licence

31. Every dealer's licence shall be in Form 18, and shall be subject to the terms and conditions therein set forth.

PART 9

GENERAL

Period of licence, etc.

32. (1) The Telecommunications Officer may, either generally or in any particular case, apply to the Governor in Council for the fixation of the period or periods for which licences may be granted and the fees, if any, payable in respect thereof.

(2) If any licence granted under the provisions of subsection (1) is accidentally destroyed, defaced or lost, the Telecommunications Officer may, on being satisfied as to the destruction, defacement or loss of such

licence, grant to the licensee a certificate setting out the purport and effect of such licence, and such certificate shall have the same force and effect as the original licence.

(3) On or after the expiration of an amateur Radio communication station licence or a broadcasting station licence, the holder of the expired licence may apply to the Telecommunications Officer for a renewal of the licence.

(4) The Telecommunications Officer, on being satisfied that the applicant has during the currency of his licence observed the conditions contained therein, shall renew the expired licence by endorsing thereon or, if a certificate has been issued in place of the original licence in pursuance of the provisions of subsection (2) by endorsing on such certificate, the period for which the renewal is granted.

Secrecy

33. (1) The holder of a licence, other than a dealer's licence, is required to preserve the secrecy of Radio communication as provided in Article 32 of the International Telecommunication Convention (Atlantic City, 1947).

(2) The interception of radio communication correspondence other than that which the station is authorised to receive, is forbidden.

(3) In the case where forbidden correspondence is involuntarily received, it must not be reproduced, nor communicated to third parties, nor used for any purpose, and even its existence must not be disclosed.

Statutory declaration

34. Every licensed operator shall before entering on his duties make the following statutory declaration—

"I, ...……..... do solemnly and sincerely declare that I will not improperly divulge to any person the purport of any message which I may transmit or receive by means of any Radio communication apparatus operated by me or which may come to my knowledge in connection with the operation of the said apparatus.

Signature of Declarant .....……

Declared before me this .....…..... day of ...….....…....., 20.…..... .

.....…..……

Telecommunications Officer".

Offence

35. Any person who acts in contravention of or fails to comply with any of the provisions of these rules is guilty of an offence and is liable on summary conviction to a penalty of $50,000 or to imprisonment for a term of 12 months or both.

Citation

36. These Regulations may be cited as the Telecommunications (Special Provisions) Rules, Revised Regulations of Anguilla T8-1.

Telecommunications Officer

CONDITIONS

1. Messages may be exchanged only with amateur stations (as defined by the International Radio Regulations) in Anguilla or abroad. Except as is in this condition expressly provided messages exchanged by means of the station shall relate solely to the Licensee's private (but not business) affairs or those of the persons with whom he is communicating and shall be in plain language. Special gramophone records for reproducing modulations of definite tones may be used for test purposes. Gramophone records of the type intended for entertainment purposes may be used on the condition that only one such record is used during the course of any day, the same record being repeated as desired; any record so used shall not have a playing time exceeding 10 minutes when played at the correct speed.

2. The use of the station for (a) advertising or business purposes, (b) the sending or reception of news or the messages of persons other than the Licensee or the person with whom he is communicating, (c) the sending or reception of broadcast programmes or (d) the sending or reception of social or political propaganda or the messages of any social or political organisation is expressly prohibited. The Licensee shall not receive any payment (either direct or indirect) for the use of the station or allow the station to be controlled by or used for the purpose of any social or political organisation.

3. If any message which the Licensee is not entitled to receive is nevertheless received, the Licensee shall not make known or allow to be made known its contents, its origin or destination, its existence or the fact of its receipt to any person (other than a duly authorised officer of Her Majesty's Government or a competent legal tribunal) and shall not reproduce in writing, copy or make any use of such message or allow the same to be reproduced in writing, copied or made use of.

4. A running record shall be kept in a book of approved type (not loose-leaf), of all sending periods showing the date and time of each period and the frequency and type of emission employed. No gaps shall be left between entries in the log. The record of sending periods shall in all cases be initialled at the time of recording by the Licensee.

5. The station shall be subject to the approval of the Telecommunications Officer and together with the record of transmissions and this licence shall be open to inspection at all reasonable times by officers duly authorised by the Telecommunications Officer.

6. An amateur station must operate within the band of frequencies specified on the licence and must be so adjusted that no interference shall be caused on frequencies outside of the specified band. Adequate frequency stabilisation must be employed and stability must be in accordance with the Radio Regulations.

7. The Licensee shall observe the provisions of the International Telecommunication Convention and the Radio Regulations.

8. The station shall always be equipped for the reception of signals sent on frequencies in current use at the station at any time by means of continuous wave telegraphy, telephony and any other type of emission authorised.

9. This licence does not authorise the reception of broadcast programmes for entertainment purposes. For the reception of broadcast programmes for entertainment a separate broadcast receiving licence is necessary.

TELECOMMUNICATION (SPECIAL PROVISIONS) ACT

AIRCRAFT RADIO STATION LICENCE

In accordance with the Telecommunications Act and with the Radio Regulations annexed to the International Telecommunications Convention now in force, this authorisation is herewith issued for the installation and for the use of the radio equipment described below:

1) Licensee Details and Validity

LICENCE Number	
Registration mark of the aircraft	
Call Sign or other identification	
Type of Aircraft (manufacturer and model #)	
Owner of aircraft	
Licensee Name	
Licensee Address	
Date of Issue	
Period of Validity	

2) Licence Terms and Conditions

Radio Equipment
The following is a generic description of the ASSI recorded radio equipment fitted to the referenced aircraft and as such the type and method of installation are ASSI approved and authorised for use in the frequency bands listed under this licence. **For registered aircraft it should be ensured that any change to the radio installation is ASSI approved with prior notification of any such change being made to ASSI to provide continued validity or reissue of this licence where appropriate.**

a	**b**	**c**	**d**	**e**	
Equipment	**Type**	**Power (Watts)**	**Class of Emission**	**Frequency bands or assigned frequencies (MHz)**	
				From	To
Communications Transmitter	VHF COM			118	137
Traffic Alert/Collision Avoidance	TCAS/ACAS			1030	1030
Emergency Search Transmitters	Search and Rescue (ELT)			406	406
Secondary Surveillance Radar	SSR TRANSPONDER			1090	1090
Survival craft transmitters (when applicable)					
Other	ADF			0.190	1.750

Equipment	DME			960	1215
	Weather Radar			9300	9500

Licence Term
This licence shall continue in force until revoked by the relevant authority or surrendered by the Licensee

CONDITIONS

3)

1. The Licensee agrees to have the above described apparatus operated at all times by an operator licensed in accordance with the provisions of the Telecommunications Act.

2. Operation shall be carried out in accordance with the Telecommunications Rules, by a qualified operator holding a telegraph or telephone license issued by the Telecommunications Officer or by a person duly authorized, as specified by the International Telecommunication Convention (Atlantic City, 1947).

3. An accurate log shall be kept of all transmissions and calls received, and shall include the frequency used and the time in Greenwich Mean Time. An accurate file of all messages shall be kept on board the vessel in a safe place for at least one year. The Iog and file shall be produced for inspection at any reasonable time by the Telecommunications Officer or by an officer authorized in writing by the Governor.

4. The radio installation, accessories and all logs and message files shall be available for inspection at any reasonable time by the Telecommunications Officer or an officer appointed in writing by the Governor.

5. The Radio Regulations annexed to the International Telecommunication Convention (Atlantic City, 1947) shall apply, and a copy of these Regulations shall be kept on the aircraft together with such Regulations as may be issued from time to time.

6. The use of radio apparatus while in port is prohibited except in cases of emergency, or for urgent messages when no other form of communication is available. Such communication may only be made to the nearest radio station. Minimum power must be used and operation must cease immediately on request.

7. It is prohibited to receive radio correspondence other than that which the station is authorized to receive but, in case such correspondence is received involuntarily, it must neither be reproduced nor communicate to third persons, nor used for any purpose whatever, and the very existence thereof must not be revealed.

8. Change of owner invalidates this license and necessitates application for a new license.

9. Licence valid from: …… to ……...

……
Telecommunications Office

10. I agree to accept and abide by the terms of this license and to operate the equipment in accordance with the requirements of the publications given in paragraph 5, or as communicated from time to time and to abide by the Oath of Secrecy, issued with the Operators Licence.

DESCRIPTION OF RECEIVER

Manufacturer	Type No	Serial No	Power	Freq.	Range	Emission

This Licence authorises the Licensee to establish and maintain a Land Station at the premises hereinbefore described (hereinafter called the "Station") and to work the Station in the mobile service for the purpose of sending and receiving spoken messages on the business of the Licensee relating to .....

between the Station and Mobile Station ..... which ..... is licensed to work for the same purpose on and subject to the conditions hereinafter contained.

The term "business" used in this Licence does not include the business of sending or receipt of messages of other persons or corporations unless the sending or receipt of such messages is authorised in writing by the Governor and subject to such conditions as may be specified in such authority.

CONDITIONS

1. The Licensee agrees to have the above described apparatus operated at all times by an operator licensed in accordance with the provisions of the Telecommunications Act.

2. Operation shall be carried out in accordance with the Telecommunications Rules by a qualified operator of British nationality holding a telegraph or telephone licence issued by the Telecommunications Officer or by a person duly authorised, as specified by the International Telecommunications Convention (Atlantic City, 1947).

3. An accurate log shall be kept of all transmissions and calls received, and shall include the frequency used and time in Greenwich Mean Time. An accurate file of all messages kept shall be on board the vessel in a safe place for at least one year. The log shall be produced for inspection at any reasonable time by the Telecommunications Officer or by an officer authorised in writing by the Governor.

4. The radio installation, accessories and all logs and message files shall be available for inspection at any reasonable time by the Telecommunications Officer or an officer appointed in writing by the Governor.

5. The Radio Regulations annexed to the International Telecommunication Convention (Atlantic City 1974) shall apply, and a copy of these regulations shall be kept on the ship together with such Regulations as may be issued from time to time.

6. It is prohibited to receive radio correspondence other than that which the station is authorised to receive, but, in case such correspondence is received involuntarily, it must neither be reproduced nor communicated to third persons, nor used for any purpose whatever, and the very existence thereof must not be revealed.

DESCRIPTION OF RECEIVER

Manufacturer	Type No.	Serial No.	Frequency Range

This Licence authorises the Licensee to establish and maintain a Coast Station at the premises hereinbefore described (hereinafter called the "Station") and to work the Station in the maritime mobile service for the purpose of sending and receiving spoken messages on the business of the Licensee relating to .....……..…..……..... between the Station and the vessel .....…….....
which .....……. is licensed to work for the same purpose on and subject to the conditions hereinafter contained.

The term "business" used in this Licence does not include the business of sending or receipt of messages of other persons or corporations unless the sending or receipt of such messages is authorised in writing by the Governor and subject to such conditions as may be specified in such authority.

CONDITIONS

1. The Licensee agrees to have the above described Station operated at all times by an operator licensed in accordance with the provisions of the Telecommunications Act.

2. Operation shall be carried out in accordance with the Telecommunications Rules, by a qualified operator of British nationality holding a telegraph or telephonic licence issued by the Telecommunications Officer or by a person duly authorised, as specified by the International Telecommunication Convention (Atlantic City, 1947).

3. An accurate log shall be kept of all transmissions and calls received, and shall include the frequency used and time in Greenwich Mean Time. An accurate file of all messages shall be kept at the Station in a safe place for at least one year. The log and file shall be produced for inspection at any reasonable time by the Telecommunications Officer or by an officer authorised in writing by the Governor.

4. The radio installation, accessories and all logs and message files shall be available for inspection at any reasonable time by the Telecommunications Officer or an officer appointed in writing by the Governor.

5. The Radio Regulations annexed to the International Telecommunication Convention (Atlantic City, 1947) shall apply, and a copy of the Telecommunications Rules shall be kept at the Station with such Rules as may be issued from time to time.

6. It is prohibited to receive radio correspondence other than that which the Station is authorised to receive, but, in case such correspondence is received involuntarily, it must neither be reproduced nor communicated to third persons, nor used for any purpose whatever, and the very existence thereof must not be revealed.

.....…….....
Telecommunications Officer

I agree to accept and abide by the terms of this Licence and to operate the equipment in accordance with requirements of the publications given in paragraph 5 or as communicated from time to time and to abide by the Oath of Secrecy, issued with the Operator's Licence.
