

DEMOGRAPHY, CULTURE, MIGRATION,
CRIME, MARITAL STATUS AND
FERTILITY
OF THE RESIDENT POPULATION OF
ANGUILLA ACCORDING TO THE MAY
2001 CENSUS

STATISTICS DEPARTMENT
MINISTRY OF FINANCE
GOVERNMENT OF ANGUILLA

Preface

This is the second publication in a series presenting analysis along with statistical tables of the results of the May 2001 Census. The subjects of the other publications will include:

- Economic Activity
- Health
- Housing and households
- Education and training.

A separate publication will be prepared on the administration of the Census rather than including it with each of the analytical publications.

In an attempt to make the results of the Census more widely available to the general public, all Census tables are being put on the Anguilla Government web site. Those without access to the web from their homes or at work can use the public library facilities for a small fee. The web address is: www.gov.ai/statistics/

All statistical publications are provided to the library for free use by the public. However, if data users would prefer a printed version of any part of a statistical publication, this can be provided at the approved fee. Payment must be made at the Anguilla Government Treasury, cheques payable to the Government of Anguilla and the receipt submitted to the Statistics Department with offices, located at The Old Court House Building, just east of the Post Office, with postal address of P. O. Box 60, The Secretariat, The Valley, Anguilla and a printed copy will be run off.

I would like to take this opportunity to thank all those who assisted in preparing this publication. Special thanks must go to Census Officer, Rosanna Browne and Analyst Programmer, Vaughn Hazell of the Department for Information Technology and e-Government Services, without whose patient assistance we would not have been able to produce the Census tables. I would also like to thank the Census enumerators and their supervisors whose hard work and perseverance made it possible for a good Census database.

Lastly I would like to thank the population of Anguilla for being so cooperative in completing the Census questionnaires in a timely manner.

The Statistics Department welcomes feedback on this and other statistical publications without which we would not be able to improve on our work. A limited number of Census tables can be produced if they are not available on the web site. Please contact the Statistics Department at 1-264 497-3901 or fax 1-264 497-3986 or e-mail PennyB@anguillanet.com.

Penny Hope-Ross
Chief Statistician

25. Crime Reported by Language Spoken, 2001
26. Crime Victim by Citizenship, 2001
27. Crime reported by Citizenship, 2001
28. Marital Union Status by Sex for Population 15 Years and Over, 2001
29. Marital Union Status by Sex and Sex for Population 15 Years and Over, 1992 & 2001
30. Marital Union Status by Sex and Citizenship for Population 15 Years and Over, 2001
31. Marital Union Status by Religion for Population 15 Years and Over, 2001
32. Marital Union Status by Number of Children for Population 15 Years and Over, 2001
33. Age of Marriage by Present Age for Population 15 Years and Over, 2001
34. Number of Children Born to people 13 Years and Older by Sex
35. Parents 13 Years and Over Who Have Born at Least One Child by Age and Sex, 2001
36. Population by Age Group, Sex and Age When Had First Baby, 2001
37. Percentage Distribution by Present Age of Parent When First Baby Was Born, 2001
38. Population by Age Group, Sex and Age Group of Last Baby, 2001
39. Number of Children by Number of Years Between First and Last Child by Sex, 2001
40. Age of First Marriage or Living in a Union by Age and Sex, 2001
41. Women Aged 15 and over by Age and Number of Children, 1984, 1992 and 2001

Introduction

This Census publication presents some of the statistical tables and their analysis from the 2001 Census. Data has also been taken from previous Censuses conducted in 1960, 1974, 1984 and 1992 for comparative purposes. Questions differ slightly from one Census survey to the next, which may affect results as does the timing of the survey. The 2001 Census uses the De Jure count for analysis. The De Jure count is defined as the population who normally lives in Anguilla for 6 months or more. Previous Censuses have used the De Facto count, which is a count of the population as of Census Day. The De Jure count is preferable for analysis as it describes the population who normally live in Anguilla and therefore to whom services are aimed to be delivered. While these differences exist, the general trend analysis is still likely to be as presented because the differences in questions and definitions are not that significant.

The dates of the Censuses were:

April 7th, 1960
April 17th 1974
April 10th 1984
April 13th 1992
May 9th 2001

This analysis is mainly historical but cross sectional analysis has been done for the newer variables such as language, ethnicity, male fertility and crime. It starts with an examination of changes in the population, it then goes on to analyse the cultural variables, which include ethnic group, language, citizenship and religion. This is followed by an analysis of the incidence of crime. Finally union or marital status and fertility are analysed.

Population

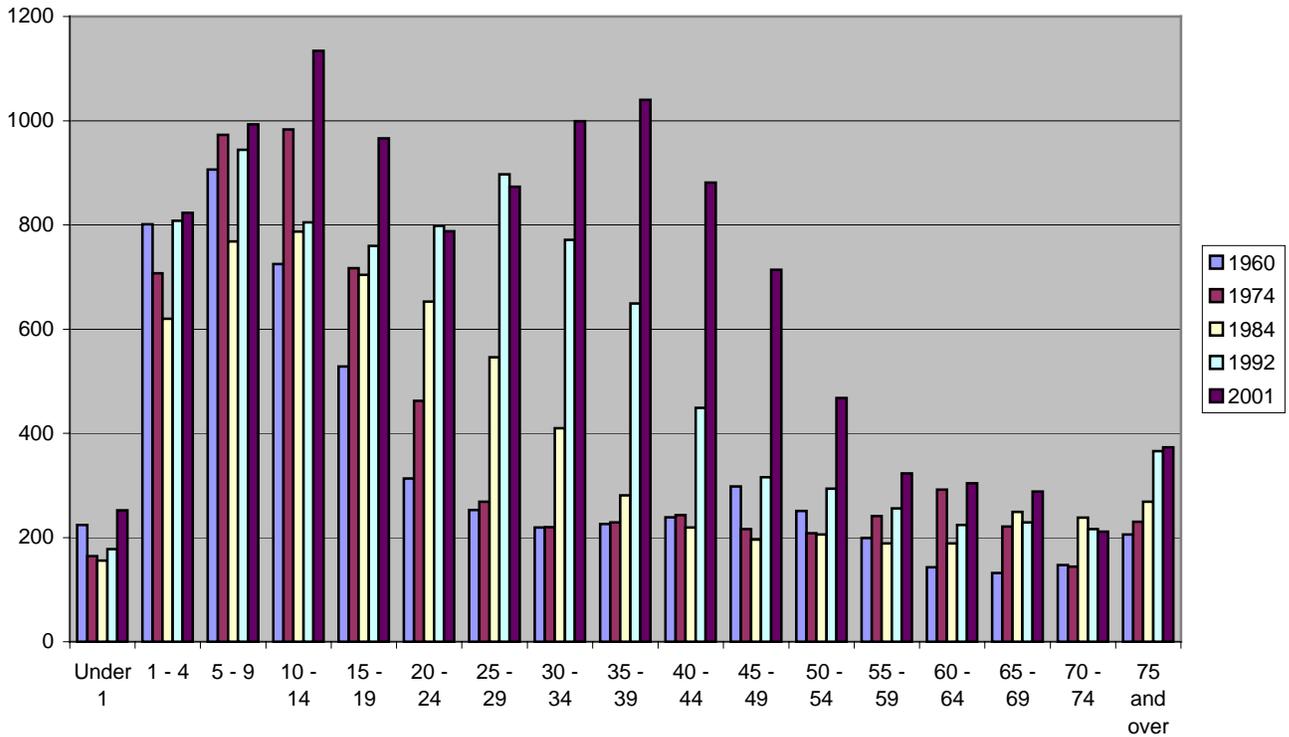

The population of Anguilla as of Census Day was estimated to be 11,561 people. 131 people did not complete questionnaires and are therefore not included in most of the analysis. The population on which the tables have been tabulated is 11,430. A broad age break down is available for these “missing persons”.

The average annual increase in the population between 1992 and 2001 was 3.2%, this is slightly lower than the previous decade. Between 1984 and 1992 the population increased by an annual average of 4.3%. The growth during the nineties was still higher than during the sixties and seventies when the population grew by an annual average of 0.9% and 0.2% respectively. (Table 1)

The main source of population growth during the nineties was from those of working age; that is those aged 15 to 64 years of age. This age group grew by an annual average of 4.2% compared to 2% for children and 0.8% for the elderly. This trend is a continuation of that seen during the eighties when the working age population grew by an annual average of 6.3%, children grew by an annual average of 2.2% and the elderly by 1.1%.

The fastest growth has been for those in their 30's. They used to make up 7.7% of the population in 1960, they now make up 17.8%. Those in their forties made up 9.2%, they now make up 13.9%. The slowest growth has been among younger children and the elderly (Table 2).

Population by Age Group, 1960 - 2001 censuses

The elderly population, that is those 65 years and over, has shown no particular trend over the period 1960 to 2001. The number of elderly declined from 485 in 1960 to 478 in 1974 and then started to increase in 1984 to 3,202 by 2001. (Table 7)

Taking a more detailed look at the wider elderly population, that is those 55 years and over, since 1984 it can be seen that their proportion of the total population has consistently declined from 16.8% in 1984 to 13.1% in 2001. This is mainly due to the faster growth rates of the working age population. The actual number of elderly has increased from 1,125 in 1984 to 1,499 in 2001. While the proportion in the age group 65 to 84 has fluctuated over the three Censuses, the proportion of those 85 years and over has steadily increased showing that people in fact are living longer.

Women made up 51% of the population and men 49% in 2001. The proportion of men in 2001 went down from 1992 when men represented 50% of the population. Their proportion had been increasing steadily until 1992. In 1960 they made up 45% of the population, 47% in 1974 and 49% in 1984. In 2001 females made up half the population in the age group under 65 years and 51% among the elderly population, as women tend to live longer than men. (Table 1)

The population Census allows for construction of life tables, or calculation of how much longer someone will live on average at a certain age. The life expectancy for a baby girl at birth is 78 while for a baby boy it is 77.9, only a slight difference between the two sexes. In 1960 the life expectancy at birth was calculated to be about 60 years for males and 63 years for females. By 1974 the respective life expectancies were 65 and 69 years.

Life Expectancy Tables Based Upon the 2001 Census Data and the Average Death Rates for 1999-2000

Age-Group	Males	Females	Total
0	77.90	78.02	77.94
1-4	77.10	77.02	77.04
5-9	73.10	73.26	73.17
10-14	68.10	68.50	68.29
15-19	63.10	63.69	63.38
20-24	58.74	58.90	58.80
25-29	53.74	54.13	53.92
30-34	49.13	49.33	49.22
35-39	44.29	44.48	44.37
40-44	39.84	39.48	39.64
45-49	35.28	34.62	34.93
50-54	30.43	30.08	30.23
55-59	26.43	25.48	25.93
60-64	21.92	20.72	21.30
65-69	17.37	15.91	16.61
70-74	13.84	12.77	13.25
75-79	12.30	9.03	10.29
80-84	9.85	6.14	7.60
85+	8.00	6.00	6.69

The child population has grown at the same rate during the eighties and nineties at 2% on average per year. However, the school age population has grown at a faster rate than those of pre-school age. In particular the population 10 to 14 years of age showed an above annual average growth rate of 4.5%. (Table 8).

Ethnicity

A question on Ethnic or Racial Origin was not asked on the Censuses from 1974 to 1992. The last time a question to obtain this information was asked, was on the 1960 Census. In 2001, people of African descent made up 90% of the population compared to 78% in 1960. The largest decline has been among those of Mixed Origins who made up 5% of the population in 2001 and 21% in 1960. Caucasian or whites made up 4% of the population in 2001 compared to less than

1% in 1960. The changes may to some extent have been due to changes in attitudes to being identified as being black or of African descent (Table 9)

Language

The 2001 Census was the first time that a question has been asked to collect this information. 99% or 11,329 people speak English well enough to carry on a conversation. There are 101 people who do not speak English. They are mostly of pre-school age or working age. Of the people who cannot speak English, Spanish is the first language for 82 of them followed by Chinese, which 7 non-English speakers speak. There are 1,054 people in Anguilla who speak more than one language, of whom 885 are 15 years of age or older. (Table 10)

The following table gives the number of languages spoken by people who speak a language other than English. Note that one person speaks six languages, 13 speak five languages, 35 speak four languages, 173 speak three languages and 881 are bi-lingual.

English	11,329
Spanish	738
French	342
Chinese	22
Italian	42
German	59
Dutch	95
Other	128

Citizenship

In previous Censuses only one citizenship was recorded. It is possible to have more than one citizenship, therefore in 2001 all citizenships held were recorded. There were 679 people who held more than one citizenship in 2001.

Non-Anguillians have increased in proportion to the total population from 9.2% in 1984 to 23.2% in 1992 to 27.4% in 2001. The largest proportion of non-Anguillians is among those of working age. Non-Anguillian children make up 25% of all children. (Table 11)

95% of Anguillians are of African ethnic origin compared to 78% for non-Anguillians of whom 11% are Caucasian compared to 1% of Anguillians. (Table 13).

The Commonwealth Caribbean has shown the largest increase between 1992 and 2001. In 2001 15% were from the Commonwealth Caribbean compared to 10% in 1992. The next most popular citizenship is American (USA) which 6% of the population held in 2001 compared to 5% in 1992. (Table 12)

Religion

In 2001 29% of the population said that they were of the Anglican religion which was the most popular followed by 24% who said they were Methodist. Pentecostal, Church of God, Seventh Day Adventist and Baptist all represented 7 to 8% of the population. While Roman Catholics represented only 6% of the population they showed the strongest rate of growth since 1992 tripling their numbers during the nineties. (Tables 14 and 15)

Birthplace and Anguillian Status

In 2001, of the respondent population of 11,430, 70% were born in Anguilla or came here before one year of age. 8,087 persons fell into the “Born in Anguilla” category leaving 3,343 who were not born in Anguilla nor came before one year of age. Of the “Born in Anguilla” persons, 881 or 11% were born overseas but came here before one year old. The percentage born overseas has been increasing since 1970 to reach 8.9% of the “Born in Anguilla” category by 2001. There are 177 people born in Anguilla but do not have Anguillian Citizenship and 106 of these people are under 15 years of age. (Table 16)

Of those who were not born in Anguilla and did not come before 1 year of age, 877 now have Anguillian citizenship that is 26% of the foreign born population. Nearly two thirds are more than 35 years old. Those with US citizenship have the highest percentage of elderly with 12% followed by the UK with 8% and Canadian and Montserrat with 7%. Santo Domingo and Guyana have the highest proportion of those in the prime working age group namely 35 – 44 year olds. (Table 17)

According to the 2001 Census of those people not born in Anguilla, 592 people said that they were on Work Permits, 920 said they were on Resident Permits and 1,652 said that they had received Anguillian status by descent, adoption, naturalisation or as a believer. (Table 18)

Migration

Of the 8,087 people who were born in Anguilla or who came here before one year of age, 20.8% said that they have lived in another country. Of these 1,682 people, the majority had immigrated back to Anguilla since 1990. The most popular country from which these people have returned is the U.S. Virgin Islands, which includes St. Thomas where more than a quarter used to live. 17% used to live in St Martin which was more popular by immigrants who returned prior to 1990.. The United States was almost as popular as St. Martin especially by those who returned during the nineties. 11% returned from the UK. (Table 19)

Crime

People 15 years and over were asked if they had ever been a victim of crime in the past year. 2.6% said that they had and of these 210, 70% or 146 reported the crime to the police. White people are more often victims of crime than other ethnic origins. However those of mixed ethnic origin are more likely to report the crime to the police. (Table 20 – 27)

Marital Status

Of the population 15 years and over, 8,190 people replied to the question on Union Status, that is there were 38 non-responses to this question. There was a greater choice of responses than in 1992 but this does not appear to have affected the results. (Table 28)

There has been little change in the union status of the population since 1992. 38% of the population said that they were married in 2001 compared to 38.2% in 1992. The percentage of people who were separated or divorced also showed little change in 2001 from 1992. The proportion of the population 15 years and over who said they were separated was 2.9% and divorced was 3.1% compared to 3% in 1992 for both statuses. (Table 29)

The greatest changes have been among those who are widowed or never married. There was 4.0% of the population widowed in 2001 compared to 5.1% in 1992. The percentage not married has increased from 50.5% in 1992 to 51.6% in 2001. The increase among those not married has been greatest among those 30 – 59 years of age.

In 1974 there was a greater tendency for Non-Anguillians to be married with one third of the adult population falling into this category than Anguillians where a quarter were married. In 2001 nearly half of non-Anguillians were married compared to one third for the Anguillian population. (Table 30)

Baptists, Seven Day Adventists and Pentecostals had at least 44% of their populations married. In contrast Anglicans, Methodists and those with no religion had more than half of their populations not married. (Table 31)

The most popular number of children among those who are married is 2 with 23% of the married population having two children. Among those who are not married most do not have children, although among those not married 19% have 3 or more children. (Table 32)

The most popular age for marriage among those who have never been in a union is 20 – 24 years of age, however among men the age group 25 – 29 years is slightly more popular. (Table 33)

Fertility

Of the 8,681 people who are 13 years and older, 95% provided information on the number of children they had born. 38% of men had had no children in 2001 and 30% of women. 2.3% of men and 2.0% of women who responded have had 10 or more children. In contrast 29% of men and 34% of women have one or two children. (Table 34)

2% of the female population under 20 years of age have children compared to 0.4% of men. Up until 35 years of age a greater proportion of women have children than do men. After this age a greater proportion of men have children than women. (Table 35)

There are 269 men and 1,008 women who had their first baby when they were under 20 years of age. Most people tend to have their first baby when they are in the 20 – 24 year age group.

However for those 30 – 44 years, the most popular age group was slightly older at 25 – 29 years. (Table 36)

There are three women aged over 70 who said they had their last baby when they were 55 years and over. Most women tend to have their last babies in the 25 – 34 age group. There are 28 men over 55 years of age who had their last baby when they were older than 55. Men tend to have their last baby in the 30 – 39 age group. (Table 38)

There is a wide diversity in the number of years between which women have their first and last baby. Two thirds of women said that their last baby was born in Anguilla and the other third said their last baby was born overseas. Among Anguillian women 75% and 40% of non-Anguillian women had their last baby in Anguilla. (Table 39)

Age of First Marriage or Living in a Union

Men tend to marry or live in a union at a slightly later age than women. 34% of men said that they were first married or living in a union at 25 to 29 years of age compared to 37% of women who said that they were first married at 20 – 24 years of age. 18% of women were married or living in a union before they were 20 years old compared to only 4% for men. 15% of men were not married until they were 35 years old compared to 9% for women. (Table 40)
