

NATIONAL ACCOUNTS

STATISTICS REPORT 2006

Prepared by
Statistics Department,
Ministry of Finance and Economic Development, Investment, Commerce and Tourism

August 2007

PREFACE TO 2006 NATIONAL ACCOUNTS

The National Accounts statistics report is published every year by the Statistics Department of the Ministry of Finance, Economic Development, Investment, Commerce and Tourism in collaboration with the Eastern Caribbean Central Bank. This publication is based on the reported returns of businesses within the various sectors of Anguilla from self-completed questionnaires distributed by the Statistics Department. Tables are prepared and revised each year by officers within the Statistics Department.

We would like to take this opportunity to thank all those business people who took time out to complete and return the survey questionnaires mailed to them. Without their co-operation it would be impossible to produce this publication. We would also like to thank the Eastern Caribbean Central Bank for their assistance in compiling these tables and to **all** the staff of the Statistics Department.

As the economy of Anguilla develops, there is a greater need for more reliable, accurate and timely economic statistics. These statistics can only be prepared with the support of the private and public sectors to develop reliable and accurate data on the economy. The primary users of this information are the Eastern Caribbean Central Bank and planners within the public and private sectors. We hope that the information contained in this publication will benefit the economic and social planners as well as private sector individuals and businesses in their decision-making. Any suggestions that may assist us in improving the quality and content of future publications are welcome.

Lori-Rae Alleyne-Franklin
Chief Statistician

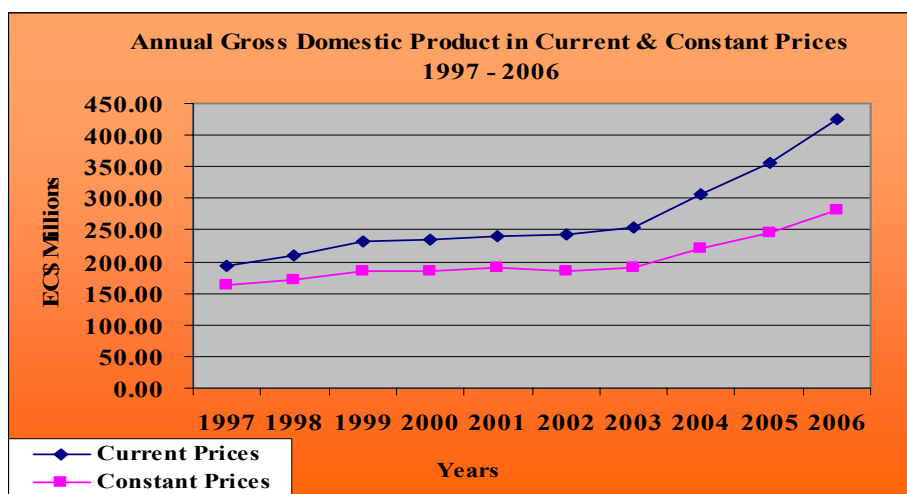

ANGUILLA'S GROSS DOMESTIC PRODUCT

REVIEW OF ECONOMIC ACTIVITY

General Economic Activity Review

The economic activity, as measured by the Gross Domestic Product (GDP), for Anguilla in 2006 totaled over XCD\$425.26 million in current prices. This is an increase of 19.3% up from the XCD\$354.41 million in 2005. Conversely, Anguilla's GDP in constant price totaled XCD\$281.88 million in 2006, an increase of 15.0% from the XCD\$245.17 in 2005.

The per capita GDP at factor cost amounted to XCD\$29,835 or US\$11,132., an increase of 14.6% over the 2005 figure of XCD\$26,134.

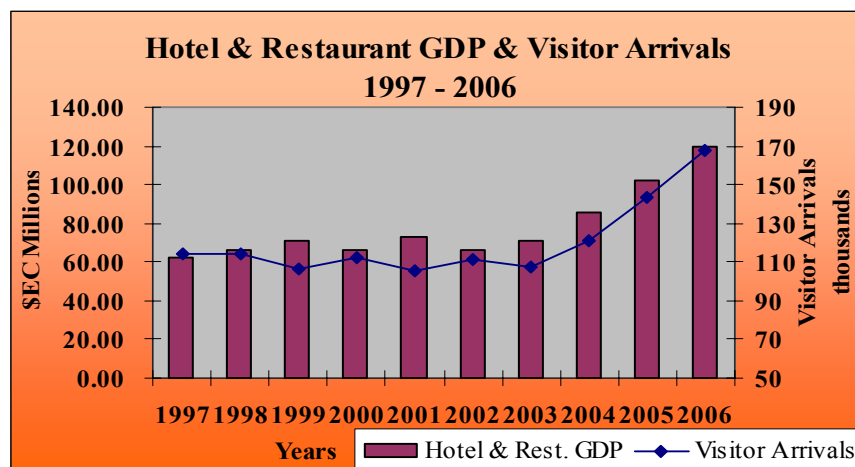

Economic Activity Review by sector

The Hotels and Restaurants sector, in current prices contributed XCD\$119.56 millions which is 28.1% of Anguilla's economic activity. This sector continued to be the largest contributing sector to the overall economy.

In constant prices this sector contributed XCD\$92.17 million, an increase of XCD\$13.74 million over the 2005 finalised figure.

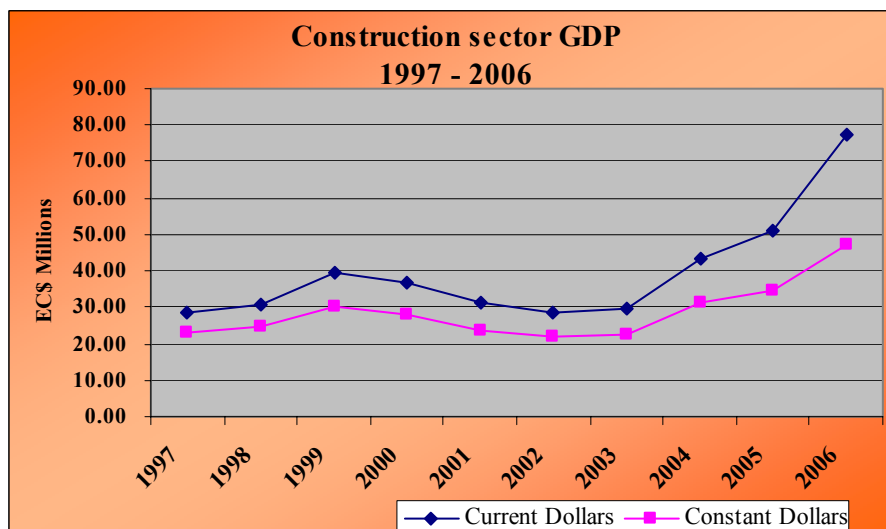

The total amount of visitor arrivals to the country in 2006 was 167,245, an increase of 16.8% over the 2005 figure. This was the third largest year-over-year growth in total visitor arrivals over the last decade with only the 1997/96 and 2005/04 figures of 32.0% and 18.5% respectively being higher. The increase of the visitor arrivals is in part due to persons visiting the island to participate in one of the scheduled thirteen carnival events, Jazz Festival, and other activities.

The Construction sector was the second largest contributor to the overall economic activity, as measured in current prices, with XCD\$77.43 million, 18.2% of the overall economic activity. The construction sector increased by 51.1% from the 2005 figure, this was buoyed in part by the major construction business projects and household activity within the economy.

In constant prices, this sector was the third largest contributor, with XCD\$47.01 suggesting that the increase in current prices was as a result of price increases as opposed to production increases.

Employment levels within the construction sector, as measured by the number of work permits issued by occupational class, in the Production, Construction, Transport, increased by 68.3% in 2006 over the 2005, 713 work permits issued.

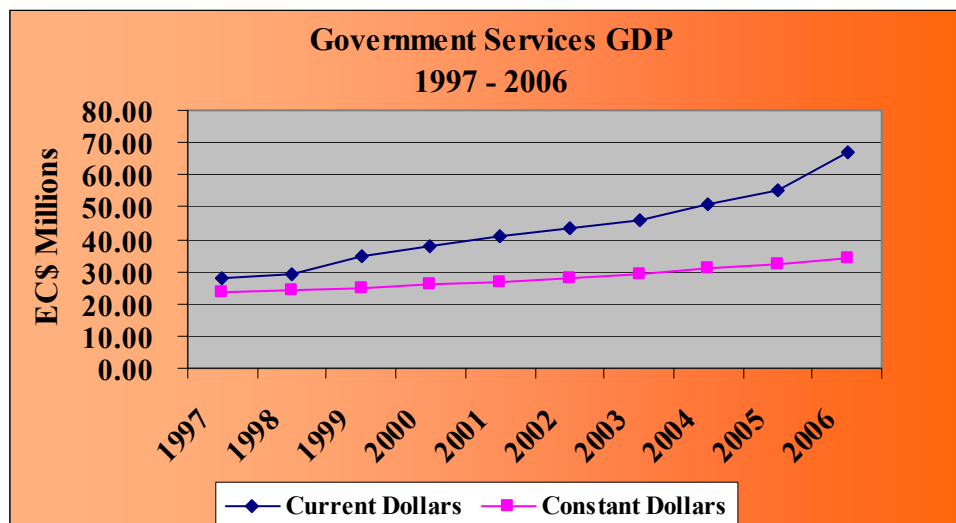

The Government Service sector was the third highest contributor, in current prices, to the overall economic activity, with XCD\$67.12; 15.8% contribution to GDP. This is an increase of 21.8% over the 2005 figure. Conversely, in constant prices, this sector contributed XCD\$34.35, an increase of 7.4% over the 2005 figure.

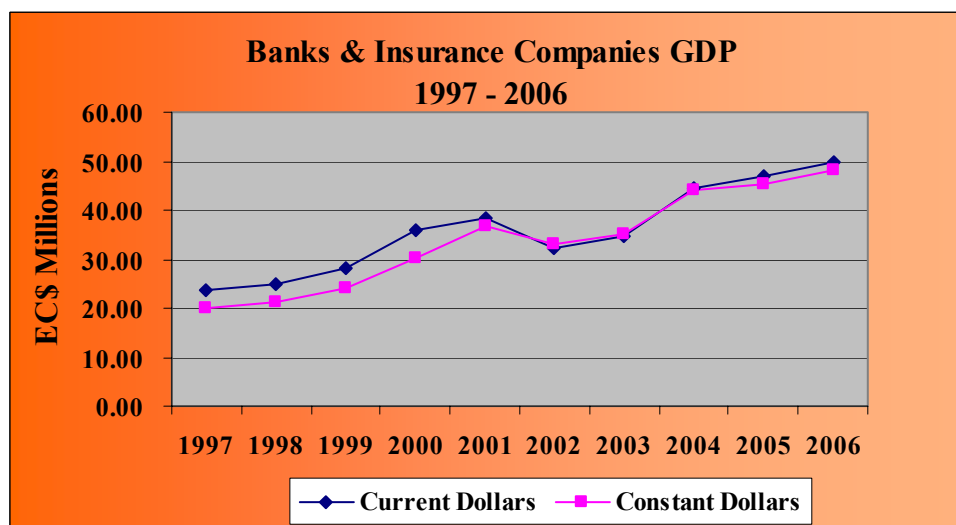

Government recurrent revenue in 2006 increased by 49.8% over the 2005 figure of XCD\$101.82 million to XCD\$152.6. There were increases in all categories of revenue areas

with indirect taxes being the largest contributor to government revenue. In 2006, XCD\$148.10 million was collected in import duties, export duties and other indirect taxes.

Government recurrent expenditure also increased over the 2005 figure, by 12.1% from XCD\$92.3 million to XCD\$125.9 in 2006. Personal emoluments, benefits, pensions & gratuities by the government in 2006 totaled XCD\$50.53 million as compared to XCD\$41.4 million in 2005.

The Banking and Insurance sector contributed the fourth highest value to the overall economic activity with XCD\$49.64 million, an increase of 6.0% from the 2006, as measured in current price, whereas in constant prices this sector contributed XCD\$48.22.

Economic indicators

The value of Anguilla exports in 2006 were XCD\$33.07 million a decline of XCD\$6.74 million while import increased by XCD\$121.00 million to XCD\$471.59 million. This resulted in a balance of trade in deficit of XCD\$438.52.
